### **ABSTRACT**

From the beginning of the first human settlement we have been aware of specific areas where we do not sleep well and get sick more easily, or where performance is lower. Dowrsers and geobiologists termed such zones as biological stress zones. The word “Geopathic” comes from the word geo meaning “Earth” and “pathos” meaning “disease”. It covers naturally occurring phenomena that cause problems for our homes and us. Geopathic Stress or harmful earth energies is natural radiation that rises up through the earth and is distorted by weak electromagnetic fields created by underground subterranean running water, certain mineral concentrations, and geological faults. The most common indications are resistance to treatment (conventional or alternative), depression, allergies, insomnia, cancer, migraine, etc. The Vastuworld Academy under PIRD established in Year 2000 has been instrumental in analytical earth energy assessment & its impact on human energetics. The objective of this study is to generate energetic communication with the earth. The method of this research has been done in the form of case studies on more than 200 varied types architectural projects & measurement of bioenergetics of human residing on these stress zones. We have concluded that by Acmos Lecher Antenna and Geo-magnetometer, we can find the intensity of geo-stresses and identify the location of these negative grid lines. Further research on how to counter and shield human well being from these stress lines has lead us to work on bio-resonance application and utilizing Indian heritage symbolism based on science of bio-geometry.

**Keywords:** Geopathy, homes, disease, Indian heritage.
